Forecast for Sunday 16 Jul 2023

Weather: Persistent rain and drizzle during the morning across much of the park, with some heavier bursts at times mainly in the west. Rain becoming more showery from lunchtime, with more in the way of brighter interludes developing. The odd shower may be heavy and thundery later in the afternoon and evening.

Chance of cloud-free hill tops above 600m: 10% in the west at first, improving to 70% by midday. 40% in the east at first, improving to 90% through the morning.

Low Cloud and visibility: Extensive low cloud with bases around 300-400m through the morning with higher western slopes in fog. Eastern slopes fairing somewhat better, but low cloud still likely affecting higher peaks through the morning. Cloud lifting by around midday and generally staying above summits through the afternoon, although could fall again in heavy showers during the evening to briefly shroud higher peaks. Visibility generally very poor through the morning in the west, with an improvement by the afternoon. Eastern areas seeing good visibility away from showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Gusty winds continuing through the day, combining with rain and showers to give some fairly treacherous walking conditions at times, especially over higher routes. Moderate to High UV levels are forecast, so carrying sun protection is recommended.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 16 Jul 2023	26.2mm	35mm	35mm

Forecast for Monday 17 Jul 2023

Weather: Isolated showers continue through the overnight period, but generally a bright start with sunny spells, mainly in the east with low cloud shrouding western slopes. A few heavier showers likely breaking out through the morning, but drying off into the afternoon with more prolonged sunny spells developing.

Maximum wind: Westerly 19-23mph, gusting up to 35mph. Easing through the evening.

Chance of cloud-free hill tops above 600m: 40% in the west at first, 80% in the east. Improving to 90% everywhere by midday.

Low Cloud and visibility: Occasional banks of low cloud affecting higher western upslopes through the morning, giving some poorer visibilities, especially in any showers. Cloud lifting above summits through the morning, with clear skies developing at times through the afternoon and visibilities markedly improving.

Temperature: **Valleys:** Plus 11 Celsius, rising to Plus 16 Celsius
At 600m: Plus 7 Celsius, rising to Plus 12 Celsius.
Freezing level: Above summits.
